AADHAAR PROACTIVE-REACTIVE ANALYSIS - EXECUTIVE SUMMARY

=====

Generated: 2026-01-19 21:52

DATA OVERVIEW

Total districts analyzed: 764

States/UTs covered: 36

Total Aadhaar enrollments: 5,435,484

Total biometric updates: 69,763,032

Total demographic updates: 49,293,347

PROACTIVE-REACTIVE SCORE (PRS)

Mean PRS: 0.415

Median PRS: 0.434

PRS range: 0.007 - 0.999

Classification distribution:

- Transition: 504 districts (66.0%)
- Reactive: 140 districts (18.3%)
- Proactive: 110 districts (14.4%)
- Crisis-Dependent: 10 districts (1.3%)

RISK ASSESSMENT

Total predicted failures (90d): 242,046

High-confidence anomalies: 16

Critical risk districts: 0

High risk districts: 0

TOP 5 HIGH-RISK STATES

- Uttar Pradesh: 48,716 predicted failures
- Bihar: 29,160 predicted failures
- Madhya Pradesh: 22,338 predicted failures
- West Bengal: 19,266 predicted failures

UIDAI Migration Analysis Report

Rajasthan: 15,926 predicted failures

MODEL PERFORMANCE

Best model: Lasso

R score: 0.9926

Stacking ensemble R: 0.9926

Models evaluated: 8

KEY RECOMMENDATIONS

1. IMMEDIATE ACTION: Focus on Crisis-Dependent districts

10 districts need urgent intervention

2. INVESTIGATE ANOMALIES:

16 districts flagged by multiple methods

3. REGIONAL STRATEGY:

Highest risk region: East (avg PRS: 0.459)

4. INTERVENTION ROI:

Most cost-effective: Awareness Drive

Cost per failure prevented: 480
